Mr. Zimny,

As we at MacLean-Fogg pass our one year anniversary of working with ZLan Systems, I felt it necessary to let you know how pleased we have been with your services. All of the ZLan personnel we have dealt with have been professional and top quality in their field. I've been impressed on how you've come up with the resources and personnel necessary to solve any situation that we have encountered along the way.

When I came to MacLean about a year ago, the systems, network, and hardware were in complete disarray. ZLan was brought in shortly after that and this is just some of the highlights of what your team and the Maclean team were able to accomplish together in less than 12 months.

- Replace failing 10 year old HP core switch with new Cisco gear.
- Documented and rebuilt entire failing network (switch and routers) to Cisco.
- Installed Cisco Wireless controller and AP points throughout multiple sites.
- Repaired a nonfunctioning VPN backup network, it now is working flawlessly.
- Completely tore down and rebuilt old data center:
 - o New room construction.
 - o Fire suppression.
 - o Full room battery backup.
 - o Rebuilt SAN.
 - o Rebuilt VM cluster.
 - o Build SQL 2005 cluster.
 - o Implemented a Back-up program that works!
- Consolidated 27 globally distributed exchange servers to six (6) centralized servers, and upgraded to Exchange 2007.
- Centralized IT Purchasing, Personnel, and Project Management under one Corporate IT umbrella.
- Streamlined and standardized Anti-virus, WUSS, and other software mass deployments.

Again, it has been a pleasure working with you and your team and I'm looking forward to many more years of continued partnership.

Brian Duffy

Sr. Director Business Systems
MacLean-Fogg
